World Biofuel Day 2023:

World Biofuel Day is marked every year on August 10. The day honours Rudolf Diesel, the individual who invented the diesel engine. The Ministry of Petroleum and Natural Gas has been celebrating the day since 2015 with a theme. However, because of no official declaration of the theme yet, World Biofuel Day will be commended on the 2022 theme, 'Biofuels for Sustainability and Rural Income.

Biofuel Day: History

World Biofuel Day holds a unique spot as it celebrates the legacy of Sir Rudolf Diesel, the mechanical engineer behind the development of the diesel engine in 1892.

On August 9, 1883, Rudolf Diesel held a crucial experiment utilizing a peanut oil machine. This observed the second he perceived the capability of vegetable oils to power machinery successfully. This experiment laid the basis for the idea of replacing fossil fuels with other renewable options. In acknowledgment of this achievement, World Biofuel Day every year observes Diesel's pioneering spirit and his commitment to the improvement of biofuels.

Biofuel Day 2023: Importance

World Biofuel Day commends one of the most noteworthy creations of history. The day additionally features the natural advantages of biofuels and promoting sustainable energy. There are a key reasons to pick Biofuels over different types of energy that are:

- Biofuels cause lesser damage to the climate in contrast with non-renewable fossil fuels.
 - Renewable energy reduces climate change and advances sustainable energy.
- Biofuel also diminishes the emissions of greenhouse gas.
 - Decrease the contamination of air and water.
