Department of Botany,  
**Report on Medicinal Plant Diversity Awareness Program**  
In Collaboration with Botany Club

Venue: Kawathi

Date: 17/01/2025

Number of Participants: 25

The Department of Botany, Rashtrapita Mahatma Gandhi Arts, Commerce and Science College, Saoli, Dist – Chandrapur, successfully organized a **Medicinal Plant Diversity Awareness Program** at Kawathi on 17th January 2025. The event aimed to educate students, farmers, and local residents about the importance of medicinal plants, their conservation, and sustainable use.

The program was led by **Prof. D. N. Watakhare** and **Dr. Sachin Choudhari** esteemed faculty members of the Department of Botany. Their insightful sessions provided in-depth knowledge on various medicinal plant species, their traditional and modern applications, and the role of biodiversity conservation in maintaining ecological balance.

**Program Highlights:**

- **Introduction to Medicinal Plants:** Dr. Sachin Choudhari discussed the historical significance of medicinal plants and their relevance in Ayurveda, Siddha, and modern medicine.
- **Identification and Uses:** Prof. D. N. Watakhare demonstrated the identification of locally available medicinal plants and explained their therapeutic properties.
- **Conservation Strategies:** Emphasis was placed on sustainable harvesting methods, conservation efforts, and the role of communities in preserving medicinal plant diversity.
- **Interactive Session:** Participants actively engaged in discussions, sharing their knowledge and experiences regarding traditional medicinal practices.
- **Field Visit:** A guided tour of the nearby forested area was conducted to observe medicinal plants in their natural habitat.

The awareness program received an enthusiastic response from the attendees, including students, researchers, farmers, and local villagers. The interactive approach and practical demonstrations significantly enhanced their understanding of the subject.

The Department of Botany expresses gratitude to the faculty members, participants, and local community members for their active involvement in making this initiative successful. Such programs contribute significantly to biodiversity conservation and the promotion of traditional knowledge of medicinal plants
